

# DAKSH

## Agentic AI for India's 5.4 Crore Construction Workers

**Team:** NIRVICALP

**Lead:** ASHUTHOSH KUMAR

**HackArena 2.0 — Hyderabad Zonals**

# THE PROBLEM

5.4 crore people build India. Nobody protects them.

## Meet Raju, 34, mason, Hyderabad:

Stands at LB Nagar (naka) every 5 AM — no guarantee of work

Has no skill record — starts from zero every single day

Thekedar pays him ₹600 — market rate is ₹950. He doesn't know.

No helmet. No harness. No contract. No bank account.

His daughter needs school fees — bank says "no income proof."

## Meet Mr. Sharma, Metro Phase 2 contractor:

Needs 50 masons tomorrow — calls 10 middlemen, wastes hours

Pays ₹1,200/worker — Raju gets ₹600. 50% stolen by middlemen.

Safety inspection due — no records, just bribes

No reliable labor database exists

A ₹3 lakh crore market running on whispers, exploitation, and paper lies.

# Why Nobody Solved This

## What Exists

Uber / Swiggy

Naukri / Indeed

NREGA

Safety Audits

Fintech Apps

## Why It Fails for Construction

Built for delivery, not skilled site labor

Needs resume, English, digital literacy

Passive, slow, corruption-prone, no matching

Post-incident, bribable, no AI prediction

Needs formal income documents to even start

**Construction labor is different: Illiterate workers, cash wages, no contracts, site-based, skill-heavy, life-risk.**

# The Solution: 5 Agents, One Platform

| Agent           | Role                                                                                           | Impact                               |
|-----------------|------------------------------------------------------------------------------------------------|--------------------------------------|
| Shram Agent     | Builds voice-based skill profile, QR digital resume, auto-upgrades worker tier                 | Worker has portable reputation       |
| Thekedaar Agent | AI job matching, fair wage suggestion, auto-generates digital contract, escrow payment         | Eliminates middlemen forever         |
| Suraksha Agent  | Worker uploads site photo → Gemini Vision checks safety → predicts accident risk → alerts GHMC | 20,000 deaths/year prevented         |
| Bachat Agent    | Tracks every rupee, generates bank-ready income proof, micro-insurance, PM-SVANidhi loans      | First bank account for 5 Cr workers  |
| Siksha Agent    | Detects skill gaps, auto-enrolls in NSDC training, builds career ladder                        | Daily laborer → certified supervisor |

# How It Works

Stage

How It Works

How DAKSH Helps

**Profile Creation**

Raju creates a digital profile using voice in his local language and becomes visible to nearby contractors.

**Smart Matching**

AI matches workers based on skills, distance, ratings, and reliability while recommending fair wages.

**Job Discovery**

Raju receives a verified job offer showing wage, contractor rating, and safety score.

**Secure Contract**

A digital contract is generated and wages are secured in escrow, ensuring transparency.

**Safety Monitoring**

AI analyzes site images to detect safety violations and improve worker protection.

**Guaranteed Payment**

On job completion, payment is released directly to Raju's account without middlemen or delays.

**Financial Inclusion**

Verified income records, work history, and reputation scores help workers access loans and financial services.

# THE PRODUCT — THREE SCREENS

## CONTRACTOR DASHBOARD

- Post job, AI suggests fair wage
- Auto-match workers by skill and rating
- Safety score per site, compliance reports
- One-click e-contract and escrow payment

## WORKER APP (₹3,000 phone)

- Check in by voice in Hindi or Telugu
- See job matches with wage, distance, safety score
- One-tap accept, QR resume, upload safety photo

## GOVERNMENT DASHBOARD

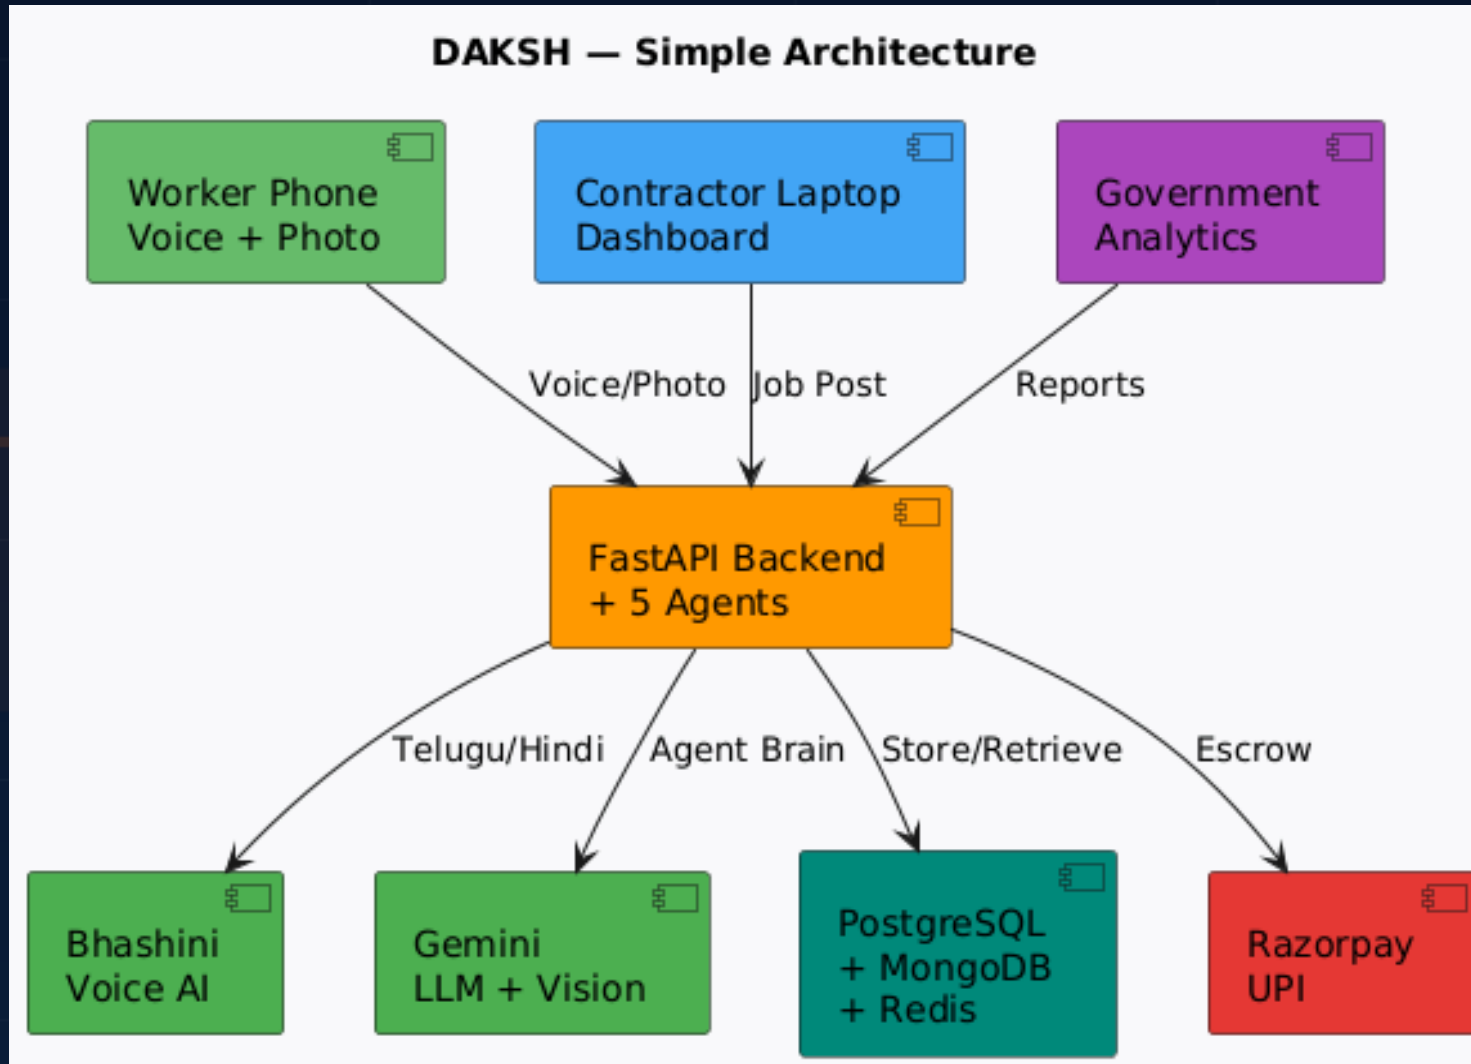

- Real-time labor analytics
- Safety violation heatmaps
- Skill gap predictions by district

All connected. All real-time. All agent-driven.

# TECH STACK

# SYSTEM ARCHTECTURE

## IMPACT

**For Workers:** Fair wages, digital contracts, instant payments, financial inclusion.

**For Contractors:** Faster hiring, verified workers, safety monitoring, compliance automation.

**For Government:** Labor visibility, safety analytics, skill tracking, workforce formalization.

**Wage Transparency:** Reduce wage theft and eliminate middlemen.

**Safety First:** AI-powered site monitoring helps prevent accidents.

**Scale Potential:** 50,000 workers → 5 lakh → 50 lakh → 5.4 crore workers.

## FEASIBILITY

**Technology Ready:** Gemini AI, Bhashini, Razorpay, Firebase, FastAPI, PostgreSQL.

**Proven Stack:** Built using production-ready technologies available today.

**Strong Economics:** Low operating cost, multiple revenue streams, scalable business model.

**Strategic Partnerships:** NSDC, Bhashini, Razorpay, Government bodies.

**Regulatory Alignment:** Supports Digital India, labor welfare, and worker formalization initiatives.

**Risk Mitigation:** Voice-first design, offline support, secure data handling, easy adoption.

THANK YOU!!!
